

STAND UP FOR Gardens of Eagan!

Martin and Atina Diffley of GOE are staring down an oil company that wants to build a pipeline through the center of their farm. They need your help!

For 32 years, the Twin Cities has enjoyed GOE's organic sweet corn, watermelons, and tomatoes. But digging machines will scrape away, compact, and destroy GOE's essential topsoil if this pipeline is built—to say nothing of what an oil spill would do to an organic farm.
